Pain Management & Opioids: A Patient-Centered Approach (A Case-Based Curriculum)

This newly updated 2026 course for Advanced Practice Nurses will increase their knowledge of the latest evidence for understanding pain management and opioids and how to apply that information to their practices using a patient centered approach to improve their patient outcomes. Our case-based session delivers a real-world educational experience through a series of cases and supporting content mapped to segments of the FDA Blueprint. This allows faculty to teach application of concepts, fostering an engaging approach to pain management education.

Presented by our nationally respected Nurse Practitioner Faculty:

Dr. Wendy Wright

Accreditation Statement

This activity is approved for 2.0 contact hours of continuing education (which includes 2.0 hours of pharmacology) by the American Association of Nurse Practitioners®. Activity ID# 26017649. This activity was planned in accordance with AANP Accreditation Standards and Policies.

This program meets many states' requirements for opioid education and is fully compliant with the Opioid Analgesic Risk Evaluation and Mitigation Strategy (REMS) education requirement ("Blueprint"), issued by the U.S. Food & Drug Administration in October 2023. As of June 27, 2023, DEA registrants are to have completed a total of at least 8 hours of training on opioid or other substance use disorders.

This educational activity is supported by an independent educational grant from the Opioid Analgesic REMS Program Companies (RPC). Please see www.er-la-opioidREMS.com for a listing of the member companies. This activity is intended to be fully compliant with the Opioid Analgesic REMS education requirements issued by the US Food & Drug Administration (FDA).
