

International Sharps Injury Prevention Awareness Month *From Our Partners at SafetyIsThePoint.org!*

International Sharps Injury Prevention Awareness Month serves as a reminder to Healthcare Providers to review safety protocols with needles and conduct training that is designed to prevent needle sticks. This month of awareness encourages us to assess how injuries occur and implement safeguards to reduce or eliminate the risk of injury by sharp devices.

To support your training and educational efforts, please visit SafetyIsThePoint.org for information on safe sharps disposal by state. You can also access **FREE** educational resources for your practice by clicking [HERE](#). Resources include a poster, rack card, fact sheet, and social media material.

We wish you all safe and happy holiday!

Learn how to
safely dispose of
household sharps at
SafetyIsThePoint.org

1

**Use a strong
plastic container.**

2

**Label "DO NOT
RECYCLE."**

3

**Place in
household trash.**
